Bald Eagle

over an Alaskan river

The majestic Bald Eagle is the national symbol of the United States. It can be found in every U.S. state except Hawaii, as well as across Canada, nesting in forested areas near water where it can hunt for fish and other prey. Bald Eagles may use the same territory for nesting year after year, and can live in the wild for more than 30 years.

Bald Eagles were in danger of extinction in 1963, with only 417 pairs left in the lower 48 states. Protections such as the Endangered Species Act and the banning of the pesticide DDT helped reverse declines from shooting, trapping, and poisoning. Thanks to the efforts of conservationists, lawmakers, and the public, Bald Eagles are making an extraordinary comeback.

Please enjoy this coloring page, compliments of the Cornell Lab—a sneak preview of our new adult coloring book from the Cornell Lab Publishing Group, *America's Favorite Birds: 40 Beautiful Birds to Color* (published August 2016).

America's Favorite Birds is a very special coloring book, featuring 40 beautiful birds in their natural habitat settings with native flora, designed and vetted with ornithologists at the Cornell Lab to ensure scientific accuracy. Our selection of species involved our community of birders across North America and more than 250,000 votes cast by Cornell Lab Facebook fans!

Learn more about this and other books available and releasing soon from the Cornell Lab Publishing Group and **SAVE 20%** on www.cornelllabpg.com by using promo code **CLPGMember20**.

By buying products with the FSC label you are supporting the growth of responsible forest management worldwide.
